the hand blown glassware workshop

"Glass Koubou Yamamura" is located in "Nihonsakari Sakaguradori Rengakan ". This glass atelier is based on the passion for people enjoying some artwork experiences with Sake of Nishinomiya. We do care for something we ourselves made. The glassworker Kajimoto-san says "I wish people would use your own made glassware for a long time with your art making memory." Parents and children can try the workshop together. It would be great if you make the one and only glassware in the world.

One and only glassware in the world

You can choose to combine your favorite shape and colors. like red, white, green, blue, yellow, and more.

The glassworkers kindly teach us how to make glasses. Little kids can do it safely. It is popular for homework for the summer vacation.

connecting Meal and Agriculture

The farmer's market where local farmers sell their products directly. "Nora Marche" had started with the hope to connect meal and agriculture. Connecting farmers and consumers directly for an opportunity to think about meal and agriculture is the aim of Nora Marche.

We face farmers and buy their products directly, then we would think "We should value foods".

This kind of experience makes us interested in food-issue. The marche holds flea markets, nature observation, workshops, hot meals, and more. Homemade sweets, baked sweet potatoes too.

It offers extraordinary experiences. Let's enjoy it.
